

# CDL Cell Phone Policy

I understand as a CDL driver I am prohibited by law to use a hand held cell phone at all times, while I am operating a Commercial Motor Vehicle. The only time I am allowed to use a cell phone while driving a vehicle is if it has a hands free feature where there is a push to talk or blue tooth feature. This feature must be a true "one touch" feature where I do not have to reach for, dial or hold while driving in a normal seated position. The hands free feature must be accessible that allows me to always have my eyes on the road and not be distracted by incoming calls. I understand I am not to initiate any calls where I have to dial a number while driving. If I am to make a call, I will pull off the road at a safe location, put the vehicle in park and then make a call. At no time will I initiate a call while I am operating a Commercial Motor Vehicle

I understand, if I do not follow this policy I can be written up and or terminated immediately for violating company policy.

I acknowledge, I have read and understand the above company policy regarding Cell phones.
